

ROTARY for a Covidfree Milan

MANIFESTO 2021-2022

A project for Rotarian service open to associations and firms for a free and mutually supportive society beyond the crises on: *Health and society – Responsible networks – artificial intelligence – Work and Integration*

Health, in all its personal, communitarian, and cosmic dimensions – physical, psychological, intellectual, social, juridical, spiritual, ecological etc. – has come to the forefront of current cultural and scientific debates, following the onset of the 2020 Covid 19 pandemic. The 2020/2021 Program of meetings and of the international congress organized by “Rotary per Milano Covidfree” – published in the volume “Insieme per una società libera dalla pandemia” (*Together for a pandemic free society*, downloading from site www.rotarypermilanocovidfree.org) – has laid the foundations for a further stage in the search for new paths and strategies for reforms useful for health and society in the future of Milan and its metropolitan area, in synergy between digital innovation/artificial intelligence and the tradition of the humanities.

We are convinced that a dialogue with experts in the various disciplines of research, involving a public attentive and ready to mobilize in concrete initiatives of social solidarity, can be the opportunity to contribute to better methods and instruments useful for both individual and public health, and to urgent projects for health reform. We think that the debate can revolve first of all around the theme of “health” applied not only to the human organism in its individual integrity – psychophysical and spiritual health, well-being, dignity, quality of life etc. – but also to interpersonal and group relations, and the health of peoples, animals, plants, and the global ecosystem.

The various conceptions of “Health”, expressed in juridical instruments (WHO, Constitutions) or cultural and spiritual traditions, or by scientific protocols and research hypotheses, will be implicitly present in the study groups and the debates we will undertake as preliminary path to an international conference to be held online in the spring of 2022. Thanks to the working and study already tested in 2020/2021, including an executive committee, a scientific committee, and a group for the management of the website, all the online meetings will be free. Like last year, the participation of the Rotary clubs and the patronage of the project involve not financial contributions, but rather a commitment to solidarity and the contribution of professional expertise, according to the Rotarian ideal, bringing together synergies and competences.

The Executive Committee of “Rotary per Milano Covidfree”:

Prof. Piergiorgio Danelli, Dr. Luciana Bovone, Prof. Alberto Scanni, Dr. Rosanna Supino, Dr. Rodolfo Rivera, Dr. Pasquale Ventura

Milano, September 29, 2021
